

Pool Room — League Hall

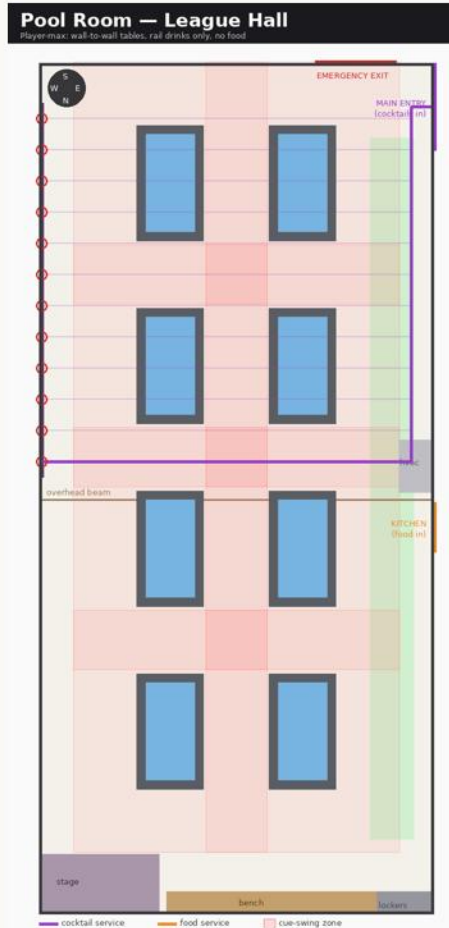

Player-max: wall-to-wall tables, rail drinks only, no food

Standing at the Main Entry sight line, eye level

Overhead render

Service-flow diagram

In brief

- Every square foot goes to play; drinks live on wall rails.
- Deliveries cross active tables; dining moves elsewhere.

The built layout: tables, classroom, and wall two-tops

Pool Room — Social Hall (current)

The built layout: tables, classroom, and wall two-tops

cocktail service

food service

cue-swim zone

In brief

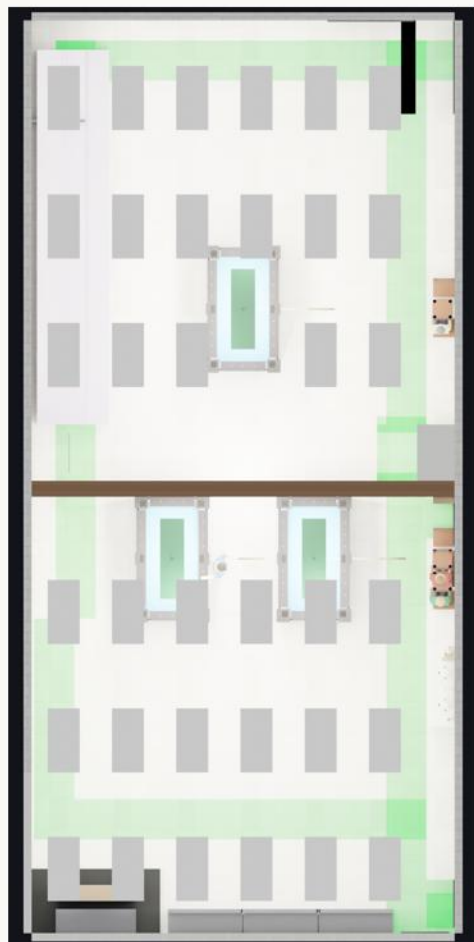

- The room as built today — the baseline for every option.
- Wall two-tops flex between drinking, dining, and watching.

Pool Room — Tournament House

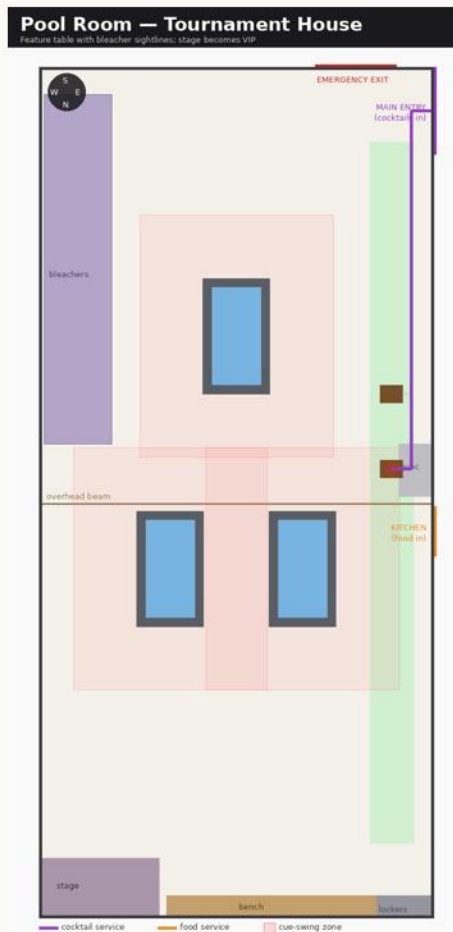

Feature table with bleacher sightlines; stage becomes VIP

Standing at the Main Entry sight line, eye level

Overhead render

Service-flow diagram

In brief

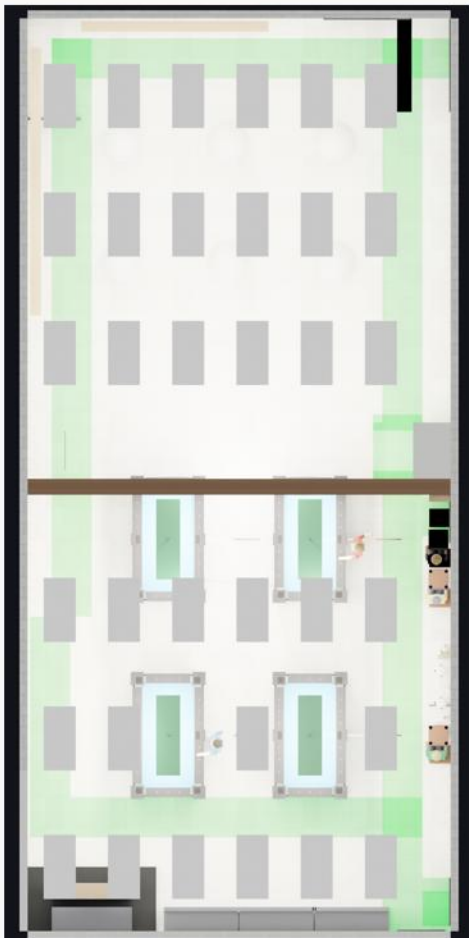

- Bleachers and the stage give the feature table an audience.
- Food drops to handhelds while racks are in play.

Pool Room — Cocktail Lounge

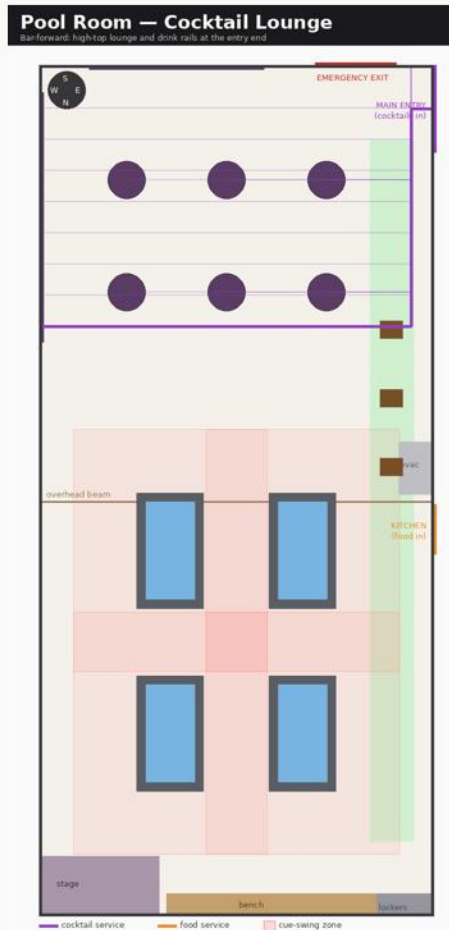

Bar-forward: high-top lounge and drink rails at the entry end

Standing at the Main Entry sight line, eye level

Overhead render

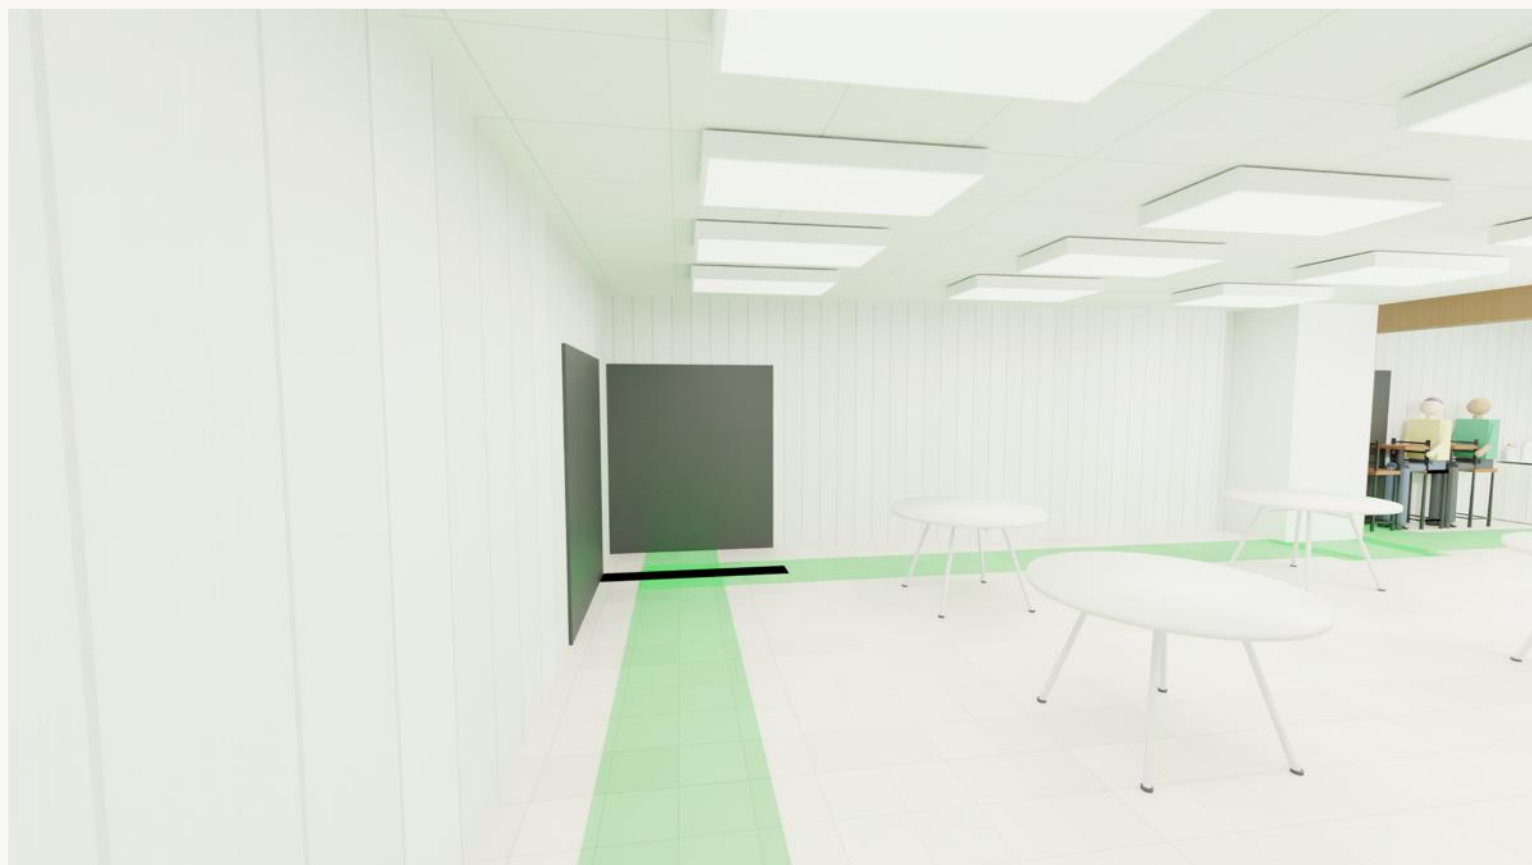

Service-flow diagram

In brief

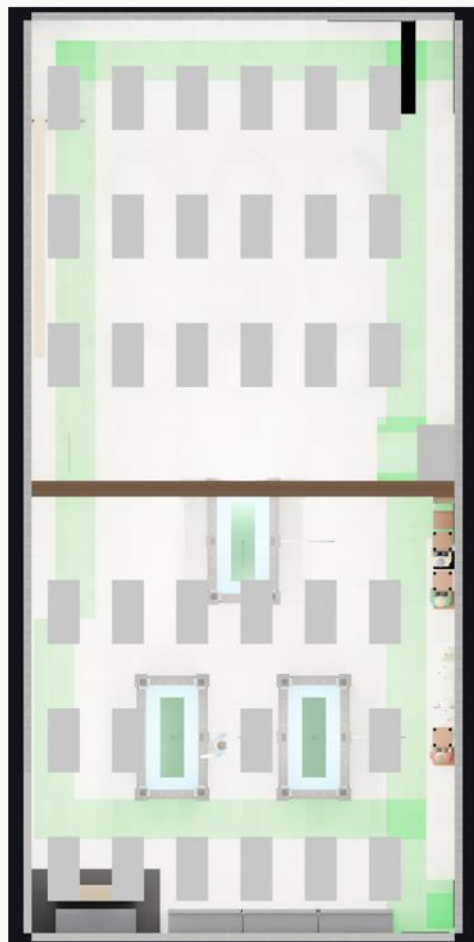

- The lounge meets guests at the door; trays barely travel.
- Play capacity gives way to beverage turf.

Pool Room — Billiards Bistro

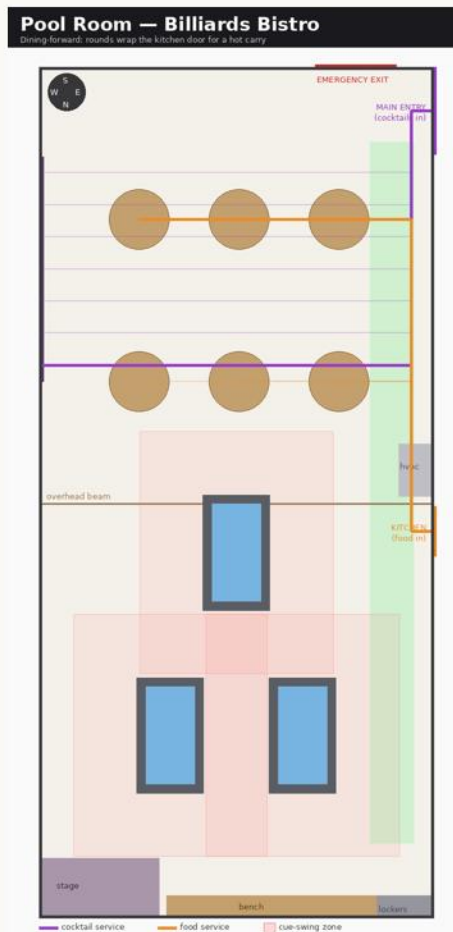

Dining-forward: rounds wrap the kitchen door for a hot carry

Standing at the Main Entry sight line, eye level

Overhead render

Service-flow diagram

In brief

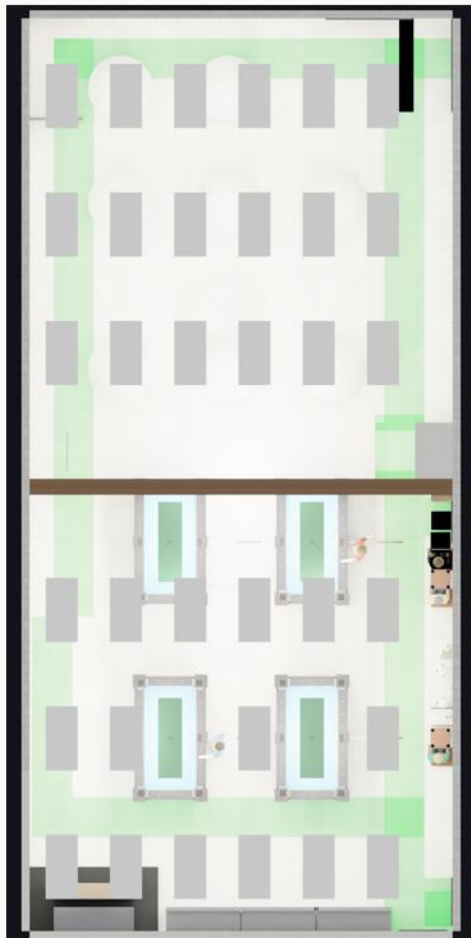

- Dinner arrives hot — the rounds sit beside the kitchen door.
- Cocktails travel farthest; a mid-room drop station would help.

Pool Room — Split-House Flex

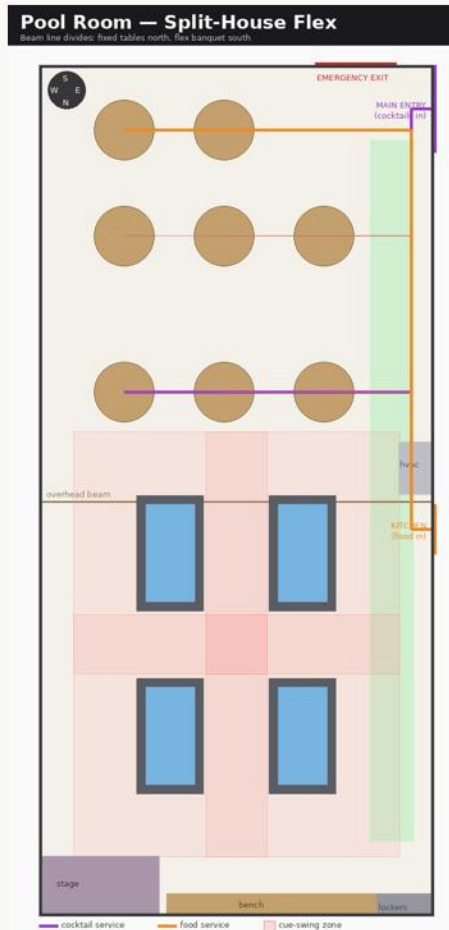

Beam line divides: fixed tables north, flex banquet south

Standing at the Main Entry sight line, eye level

Overhead render

Service-flow diagram

In brief

- Service never crosses the play zone — both doors land in the flex half.
- The south half flips between banquet, dining, and overflow.
